

ENVIRONMENTAL POLICY

In the company Goričane, d.d. we are aware that caring for a healthy environment is a fundamental condition of our activity, because our production of wood-free papers affects the environment, and our activities and development are highly dependent on a healthy environment. Environmental protection is the right, duty and responsibility of all employees and is an integral part of managing a company.

Company management and all employees commit ourselves to the following:

- constant recognition and consideration of the context of the organization by our management;
- constant monitoring and measuring of environmental aspects (impacts on the environment) and taking suitable action in the event of deviations;
- constant prevention of negative impacts on the environment and their elimination with clearly set programs;
- constant identification and verification of the relevant risks, which enables us to take timely and appropriate actions in order to prevent accidents;
- regular monitoring and adherence to the legislation;
- improvement of the ecological state in our company upon adhering to the guidelines and regulations pertaining to the environmental protection;
- meeting the environmental demands of the local community, our customers and other direct stakeholders;
- inclusion of rational usage or reduction of consumption of all materials and energy;
- planning and implementing new technologies and products in accordance with the principles of the environmental protection and energy efficiency.
- usage of safe and environmentally friendly raw materials;
- usage of fibres of those suppliers, who ensure sustainable forest management taking into account the production, ecological and social aspects of forest management and provide traceability to the origin and type of wood;
- evaluation of the competence of contractors and suppliers in terms of environmental protection;

GORIČANE

- caring for the environmentally friendly treatment of waste;
- educating and empowering employees to maintain responsible attitude towards the environment;
- cooperation with internal and external publics in promoting environmental development;
- informing the internal and external publics about our achievements in the field of environmental protection;
- constant improvement of the environmental management system in order to improve the effects of environmental management;
