Information about REACH (Regulation EC no. 1907/2006 - REACH)

According to the European REACH Regulation (EC no. **1907/2006**), our product »paper in rolls and sheets« is defined as an »article« and is excluded from direct registration.

Substances being intentionally released from articles need to be registered according to the REACH requirements. We would like to inform you that we do not produce paper with intended release substances, so we are not obligated to register.

According to the REACH regulation, the safety data sheet is obligatory for a substance or a preparation (Article 31). Paper is not treated as a substance or preparation, so there is no need for a safety data sheet for the paper from the paper mill Goričane.

Suppliers of articles must give their customers information allowing for the safe use of their articles if they contain substances of very high concern (SVHC) at a concentration above 0.1% (Article 33).

Based on our knowledge and current available information, Goričane d.d. does not manufacture products containing substances of very high concern as listed on the Candidate List of SVHC published by the European Chemical Agency (ECHA) and updated on 17th January 2022.

The list of substances of very high concern (SVHC) is available on the European Chemical Agency (ECHA) website at <http://echa.europa.eu/sl/candidate-list-table>.

If you have any further questions regarding REACH, please do not hesitate to contact us on e-mail address okolje@goricane.si.

Maja Šušteršič, chemical adviser
